Pellet & Corn Annual Service

For your safety and peace of mind, regular maintenance on your pellet or corn appliance ensures reliability, safety, and will help prolong the life of the appliance and its components. As such, it is important that your appliance be inspected and cleaned yearly.

Allow one of our certified technicians to:

- Empty ash traps and clean exhaust passages behind the fire chamber
- Clean and lubricate fans and motors
- Clean the hopper and fuel feed system
- Clean the heat exchanger system
- Clean exhaust pipes and reseal the venting system if required (if you have a pellet insert instead of a stove, please specify at time of booking)
- Verify and adjust the stove settings with proper gauges and meters (mechanical and electric components may eventually wear out and need repair or replacement)
- Clean glass with special high temperature cleaner

Rates

- **Peak Season:** \$229 + GST
- **Slow Season:** \$159 + GST

* Additional travel charge for customers outside of Peterborough County
