

WOODBURNING

taste is everything™

1903 - Oval with Reservoir

HEARTLAND WOODBURNING COOKSTOVES

You may feel yourself being naturally drawn to Heartland's woodburning cookstoves. After all, the original Oval has been heating homes, warming water and cooking meals for almost a century. We are proud to report that today's models offer the same dependability, comfort and tremendous versatility. Heartland has incorporated some important changes to make your life a whole lot easier than your ancestor's. Available in a choice of two models: the Oval or the Sweetheart.

Holds its Own Power

With a Heartland Woodburning Cookstove, you can keep your home glowing through ice and snow and power failures. The Oval is capable of heating up to 1800 square feet and the Sweetheart, up to 1500 square feet. No matter what is happening outside, you can still enjoy everything from a steamy bath to a hot cup of cocoa to a snug night's sleep. (With optional water jacket.)

Keeps You in Hot Water

Choose an optional copper reservoir with a tap or install a hot water jacket. The installed water jacket can heat a 40-gallon water tank in an hour with the stove running at full operation. Many owners choose to run this system on a thermosyphon, eliminating the need for electricity. Wood heat can be very dry but the water reservoir provides ample humidity. Use it to do all the dishes.

Note: Refer to water jacket manual and have it installed by a professional.

Unforgettable Flavor

Find out firsthand why your grandmother always said that nothing matched a pie baked in the cookstove. The oven is heated from all sides, cooking the food evenly and to perfection every time. Thaw your frozen food, warm your plates or watch your dough rise in the warming closet.

Lighten Your Workload

You're intrigued with the idea of owning a Heartland Woodburning Cookstove but feeling like it might be too labor intensive to maintain. Think again. Fuel can be top or front loading, the oven interior is porcelain coated with an ash pan that slides out for cleaning. This is the good old days - only better.

Reservoir

Woodburning Features

Oval Woodburning Cookstove Model 1902 (Model 1903 with Reservoir)

- Warms up to 1,800 square feet
- Solid cast iron cooking surface
- 2.4 cubic foot oven – largest available on any woodburning cookstove
- Upper warming cabinet
- Top or front fuel loading
- Large firebox for improved efficiency (less chopping and stoking)
- Ash pan on sliding track
- Options for hot water needs: 5 gallon copper reservoir with spigot or hot water jacket
- Optional Coal Grate Kit
- Optional Fresh Air Kit
- Optional Heat Shield for reduced installation clearances. Check installation manual for clearance specifications.

Sweetheart Woodburning Cookstove Model 2602 (Model 2603 with Reservoir)

- Warms up to 1,500 square feet
- Solid cast iron cooking surface
- 1.7 cubic foot oven
- Upper warming cabinet
- Top or front fuel loading
- Large firebox for improved efficiency (less chopping and stoking)
- Ash pan on sliding track
- Options for hot water needs: 5 gallon copper reservoir with spigot or hot water jacket
- Optional Coal Grate Kit
- Optional Fresh Air Kit
- Optional Heat Shield for reduced installation clearances. Check installation manual for clearance specifications.

Important Note: Photo illustrates cooker installed against a non-combustible wall. Observe clearance requirements as outlined in our installation guide.

HEARTLAND Artisan

The Artisan woodburning cookstove is unlike any other woodstove. The Artisan's gentle, radiant heat is transferred through the internal cast iron structure, spreading the heat evenly to the ovens and hotplates. By bathing food in heat from all directions, flavors are sealed in without drying. You'll serve more succulent roasts, juicy on the inside and perfectly brown on the outside. Your vegetables will be more flavorful, retaining both texture and natural color. The engineering that has gone into the Artisan will offer some of the lowest clearances available from any wood cookstove while still producing the natural opulent heat that only wood cooking can provide.

Artisan Features

Model HL-ARTISAN

- The very large firebox of the Artisan provides longer burn times and can accommodate wood up to 16" in length.
- Two insulated lids help retain heat on the hotplate when closed. When open heat radiates into the room.
- The hotplate is made of solid one-piece cast iron. Going from a simmer to a boil is as easy as sliding the cookware.
- Features a temperature gauge on the main over door which provides approximate heat levels within the oven.
- The main oven, approx. 1.5 cu.ft. is ideal for all types of cooking. Gentle indirect heat radiates in from all sides.

- A second oven below provides a second cooking area and operates at around half the temperature of the main oven.
- The solid, cast iron construction and design of the Artisan allow for some of the lowest clearances in the industry*.
- The Heartland Artisan is covered under warranty for a full 1 year on the entire product.

* See site preparation guide for details.
